

Domino's Pizza

Nutrition Guide

Using the Food Pyramid as guide, Domino's Pizza can be part of a healthy, balanced diet. Because pizza is customizable, it is possible to enjoy a variety of foods (bread, vegetables, cheese and meats) on a single slice.

We choose our ingredients on the basis of safety, taste, and nutritional content to bring our consumers what they want.

Domino's Pizza dedicates its attention, energy, and resources to one mission: deliver a delicious, hot, and fresh pizza every time.

Every pizza ordered has the potential to be a totally unique creation, and this nutritional guide reflects that range of possibilities. Nutritional information is provided for each of the elements that goes into a pizza: what size pizza, what type of crust, sauce, toppings. When you create your own pizza, to see the total picture of what you are ordering, add together the numbers for each element from these charts. For "Feast Pizzas," "Domino's American Legends," "Oven Baked Sandwiches," "Domino's BreadBowl Pasta," and the side items, there is no need to add: the ranges for these items are the total. For more nutritional information, use the Cal-O-Meter when you visit www.dominos.com.
